### Overall Comments

The year 2019 marked the seventeenth writings of the Fryer, Galois and Hypatia Contests. The FGH Contests are designed to give students in Grades 9, 10 and 11 an additional mathematical challenge during the school year, and one that requires full written solutions. Being able to do mathematics is an important skill; being able to communicate one's findings (in mathematics or in any other field) is also very important.

We were very pleased this year to see another healthy increase in the number of participants in these Contests. In general, many students writing these Contests are doing a better job each year of writing clear solutions to the problems. That being said, there is always work that can be done to help them improve these skills. Some students reduced their scores because they gave answers rather than solutions or presented untidy or illegible solutions.

The averages on the Fryer, Galois and Hypatia Contests this year were 24.8, 20.8 and 26.8, respectively. We will continue to try to keep the averages on these papers in this range. Here are some specific comments on the problems.

### Fryer Contest

1. Average: 8.1

Well done. Some students struggled with the definition of perimeter: some used area and others looked at half of the perimeter. Part (a) was well done. When students missed the link between part (b) and (a), there were many logic and arithmetic errors in part (c) and part (d).

2. Average: 8.4

Well done.

3. Average: 5.6

Parts (a) was done well. The justification presented for solutions to (b) was not well presented: there were many disconnected equations presented with no explanations or connections made. In part (c), many students were aware that the formula given before Problem 1 was to be used here. However, some students had difficulty finding the 200th number, understanding it to mean that 200 was the last number.

4. Average: 2.8

Part (a) was well done. A number of students answered (b) as well. In c) a number of students did a prime factorization but did not know where to go from there. For part d) there seemed to be a lot more good attempts than expected. When they started the question, the logic was typically sound.

### Galois Contest

1. Average: 9.0

This question was well done. Some students struggled with understanding the promotional deals given in part (c).

2. Average: 7.2

Parts (a) and (c) were well done. In part (b), some students missed the straightforward approach of using the equations of lines to find the intersection point and instead used methods involving similar triangles or the Pythagorean theorem. These other approaches often led to errors. In part (c), some students used a trial and error method that worked but if the solution had had less "nice" numbers, this approach would not have been useful.

3. Average: 3.2

Parts (a) and (b) were reasonably well done. In part (b), some students misunderstood the question and gave a number  $n$  that was divisible by  $7^2$  instead of considering when  $n!$  is divisible by  $7^2$ . In part (d), it was reasonably common for students to find a solution but not to justify that it was the only solution.

4. Average: 1.4

Many students got part (a) correct but their explanations were not precise. Part (b) involved lots of challenging case work. Some students found values that worked but struggled to find a general argument.

### Hypatia Contest

1. Average: 8.8

Well done.

2. Average: 7.9

Well done. In part (d), the most common error occurred when students failed to increase by a factor of  $4/3$  each time. Some students also gave the results for Path 4 ( $n = 81$ ) instead of Path 5 ( $n = 243$ ).

3. Average: 6.8

Parts (a) and (b) were well done. Many different approaches were taken for part (c). Most students were able to write a correct equation. Student errors occurred as a result of attempting to square both sides of the equation before isolating the radical.

4. Average: 3.3

In part (a), some students solved for  $c$  in terms of  $x$  and  $y$  instead of solving for  $x$  and  $y$  in terms of  $c$ . Many problems occurred in the first two parts as a result of a substitution error or rearranging an equation incorrectly. In part (b), many students missed the negative divisors of 6. In part (c), students seemed intimidated by the algebra. It turned out that solving for  $y$  was easier than solving for  $x$ .

### Commentaires généraux

L'année 2019 est la dix-septième édition des concours Fryer, Galois et Hypatie. Les concours de FGH ont été créés pour donner aux étudiants de 9e, 10e et 11e année (sec. III, IV et V) un défi mathématique supplémentaire pendant l'année scolaire qui exige des solutions écrites complètes. Être capable de faire des mathématiques est une aptitude importante. Pouvoir communiquer ses conclusions (en mathématiques ou autres domaines) est aussi très important.

Nous sommes ravis cette année de constater une croissance du nombre de participants à ces concours. En général, plusieurs des étudiants participant à ces concours s'améliorent d'année en année en ce qui concerne écrire des solutions claires. Cependant, il y a toujours du travail à faire pour les aider à développer leurs aptitudes. Certains des étudiants ont eu des notes plus basses car ils présentaient uniquement des réponses au lieu de solutions ou des solutions non soignées ou illisibles.

Cette année, les moyennes des concours Fryer, Galois et Hypatie étaient de 24,8, 20,8 et 26,8 respectivement. Nous tenterons de continuer à conserver cette gamme pour les moyennes de ces examens. Voici quelques commentaires spécifiques sur les problèmes de ces examens.

### Concours Fryer

1. Moyenne: 8,1

Bien réussi. Certains étudiants ont eu des difficultés avec la définition du périmètre : certains ont utilisé l'aire et d'autres n'ont pris en compte qu'une moitié du périmètre. La partie (a) a été bien réussie. Lorsque les élèves sont passés à côté du lien entre les parties (b) et (a), de nombreuses erreurs logiques et arithmétiques ont été commises dans les parties (c) et (d).

2. Moyenne: 8,4

Bien réussi.

3. Moyenne: 5,6

La partie (a) a été bien réussie. La justification offerte pour les solutions de (b) n'a pas été bien présentée : de nombreuses équations décousues, sans explications ni connexions entre elles. Dans la partie (c), de nombreux étudiants savaient que la formule donnée avant le problème 1 devait être utilisée ici. Cependant, certains élèves ont eu du mal à trouver le 200<sup>e</sup> nombre, pensant que 200 était le dernier.

4. Moyenne: 2,8

La partie (a) a été bien réussie. Un certain nombre d'étudiants ont également répondu à la partie (b). Dans la partie (c), un certain nombre d'étudiants ont fait une factorisation en nombres premiers mais ne savaient pas quoi faire à partir de là. Pour la partie (d), il semble qu'il y ait eu beaucoup plus de bonnes tentatives que prévu. La logique était généralement bonne au commencement de la question.

### Concours Galois

1. Moyenne: 9,0

Cette question a été bien réussie. Certains étudiants ont eu du mal à comprendre les offres promotionnelles présentées dans la partie (c).

2. Moyenne: 7,2

Les parties (a) et (c) ont été bien réussies. Dans la partie (b), certains étudiants n'ont pas pensé à l'approche directe consistant à utiliser les équations de droites pour trouver le point d'intersection, mais ont utilisé des méthodes utilisant des triangles similaires ou le théorème de Pythagore. Ces autres approches ont souvent conduit à des erreurs. Dans la partie (c), certains étudiants ont utilisé une méthode par tâtonnement qui a fonctionné, mais si la solution avait eu moins de "bons" nombres, cette approche n'aurait pas été utile.

## 3. Moyenne: 3,2

Les parties (a) et (b) ont été raisonnablement bien réussies. Dans la partie (b), certains étudiants ont mal compris la question et ont donné un nombre  $n$  divisible par  $7^2$  au lieu de considérer quand  $n!$  est divisible par  $7^2$ . Dans la partie (d), il était assez courant que les étudiants trouvent une solution, mais ne justifiaient pas que c'était la seule solution.

## 4. Moyenne: 1,4

Beaucoup d'étudiants ont correctement répondu à la partie (a) mais leurs explications n'étaient pas précises. La partie (b) comprenait de nombreux cas difficiles. Certains étudiants ont trouvé des valeurs qui fonctionnaient mais ont eu du mal à trouver un raisonnement général.

**Concours Hypatie**

## 1. Moyenne: 8,8

Bien réussi.

## 2. Moyenne: 7,9

Bien réussi. Dans la partie (d), l'erreur la plus commune s'est produite lorsque les étudiants ont échoué à augmenter d'un facteur  $4/3$  à chaque fois. Certains étudiants ont également donné les résultats pour le chemin 4 ( $n = 81$ ) au lieu du chemin 5 ( $n = 243$ ).

## 3. Moyenne: 6,8

Les parties (a) et (b) ont été bien réussies. De nombreuses approches différentes ont été adoptées pour la partie (c). La plupart des étudiants ont été capable d'écrire une équation correcte. Les erreurs des étudiants sont dues à la tentative de concilier les deux côtés de l'équation avant d'isoler le radical.

## 4. Moyenne: 3,3

Dans la partie (a), certains étudiants ont résolu le problème pour  $c$  en fonction de  $x$  et  $y$  au lieu de résoudre pour  $x$  et  $y$  en fonction de  $c$ . De nombreux problèmes sont survenus dans les deux premières parties à la suite d'une erreur de substitution ou en réarrangeant une équation de façon incorrecte. Dans la partie (b), de nombreux étudiants ont omis les diviseurs négatifs de 6. Dans la partie (c), les étudiants ont semblé intimidés par l'algèbre. Il s'est avéré que résoudre pour  $y$  était plus facile que de résoudre pour  $x$ .
