

Problem of the Week

Problem A

Building Blocks

Johnna Lee loves to build with interlocking building blocks. She starts building on a large, white, flat piece for the base, but the rest of the blocks she uses are red. Looking from overhead, this is what Johnna Lee built.

Each of the red blocks has a length of 2 cm and a width of 1 cm.

- A) What is the area of the white base?
- B) What fraction of the area of the base is covered by red blocks?
