Problem of the Week
Problem B and Solution
Amazing Grids

Problem
If possible, for each maze, find your way from the top left square to the bottom right square, moving only horizontally or vertically to achieve the set of numbers specified in the title.

Solution
Solutions are given as continuous lines on the first three mazes. The final maze has no solution; two (of many possible) attempts are shown with dotted lines, both working forward and backward, but both dead-end.
