1. Pet Race

The results of the Orangetown Annual Pet race have gone missing! Can you help by determining each pet’s name, owner and place they came in?

Clues:
(a) Fluffy wasn’t awarded second place, but the rabbit placed 4th.
(b) The turtle placed lower than Zippy the sloth, but higher than Riley’s pet.
(c) Parker’s pet, which wasn’t a sloth, was awarded first place.
(d) Sidney’s pet wasn’t named Spot.
(e) In no particular order, the four pets were the pet named Whiskers, Charlie’s pet, the pet who won 3rd place and the lizard.
2. **Across the River**

Three athletes, Alex (whose coach is Liam), Ben (whose coach is Mike), and Carly (whose coach is Nora), are trying to get across a river. None of the coaches trust any of the other coaches to stay with their athlete while they are not there. For example, Mike cannot be with Alex while the boat is in the water and Liam is not there. But, Mike could drop off Ben on the side that Alex is on, so long as Mike immediately turns back for the other shore, not carrying Alex back with him. Either a coach or an athlete can drive the boat, but someone must drive the boat for it to cross. At most two people can be in the boat at any one time. How can they all get across?

3. **Places Please!**

Nine friends, Alex, Blacke, Casey, Drew, Eddie, Finn, Gale, Harper and Jamie rent an apartment together. There are nine rooms to assign - laid out in three storeys as shown below. Each friend will be assigned exactly one room. The friends have some requirements, listed below. Can you help them pick rooms so that they are all happy?

**Requirements:**

(a) Alex wants to live directly to the left of Finn and right under Harper.

(b) Drew wants to live right under Finn and directly to the right of Jamie.

(c) Eddie wants to live below Casey, who wants to live below Gale.

(d) Blake wants to live on the right side of the building.
4. Nonograms

a)

b)

Hint: As is sometimes the case, for this one, the spaces that you cannot colour are equally as important as those you do colour.
5. **Einstein’s Riddle**

There are 5 people and 5 houses in a row. Each person is of a different nationality (British, Swedish, Danish, Norwegian, and German), and each of their houses is a different colour (Green, White, Red, Yellow, and Blue). Additionally, each person eats one type of candy (Snickers, Starburst, Skittles, Jelly Beans, or Mike & Ike) and each raises a different type of pet (cats, birds, horses, dogs, and fish). Finally, each owner drinks a different beverage (milk, coffee, tea, water or juice). Who raises the fish?

**Clues**

(a) The Brit lives in the red house.
(b) The Swede keeps dogs as pets.
(c) The Dane drinks tea.
(d) The green house is directly on the left of the white house.
(e) The green house owner drinks coffee.
(f) The person who eats snickers raises birds.
(g) The owner of the yellow house eats skittles.
(h) The person in the centre house drinks milk.
(i) The Norwegian lives in the first house.
(j) The person who eats starburst lives next door to the one who keeps cats.
(k) The person who keeps a horse lives next to the person who eats Skittles.
(l) The person who eats jelly beans drinks juice.
(m) The German eats Mike & Ike.
(n) The Norwegian lives next to the blue house.
(o) The person who eats starburst has a neighbour who drinks water.
