The CEMC has created lots of resources that we hope you have found interesting over the last few months. We also know that there are a lot of online games and puzzles created by other organizations that make use of mathematics and logic. We’ve highlighted three examples below that you can explore for more mathematical fun!

**Deep Sea Math Mystery** from Math Playground (https://www.mathplayground.com)
In this puzzle you need to use logic and number sense to figure out how many seashells belong to each sea creature.

**Square It** from NRICH (https://nrich.maths.org)
Race to be the first to make a square in a grid. Can you develop a strategy to win the game?

**Factor Game** from NCTM (https://www.nctm.org)
Challenge another person or the computer in this strategy game involving factors of positive integers.

You can find other interesting mathematics related games and puzzles online. Share your favourites using any forum you are comfortable with.
