The CEMC has created lots of resources that we hope you have found interesting over the last few months. We also know that there are lots of online games and puzzles created by other organizations that make use of mathematics and logic. We’ve highlighted three examples below that you can explore for more mathematical fun!

**Fraction Game** from NCTM (https://www.nctm.org)
To make moves in this game, you need to use logic and number sense involving fractions.

**The Remainders Game** from NRICH (https://nrich.maths.org)
Use your knowledge of remainders to figure out a mystery number.

**Slitherlink Puzzles** by Krazydad (https://krazydad.com)
In a Slitherlink Puzzle, you connect horizontally or vertically adjacent dots to form a meandering path that forms a single loop, without crossing itself, or branching.

You can find other interesting mathematics related games and puzzles online. Share your favourites using any forum you are comfortable with.
