

Problem of the Week

Problem E

Spiral

A spiral of numbers is created, as shown, starting with 1.

If the pattern of the spiral continues, how will the numbers 2020, 2021, and 2022 appear in the spiral? (Will they appear left to right in a row? Right to left in a row? Down in a column? Up in a column? Down and then left? Up and then right?)
