

## Problem of the Week

### Problem A

### Healthy Eating

Ms. Morgan's health class is discussing healthy eating choices. She asked 9 of her students to write down how many servings of fruits or vegetables they eat every day. The following chart shows the results.

**Servings of Fruits or Vegetables per Day**

Student's Name	Number of Servings
Vlad	3
Tessa	2
Shaheed	4
Maja	2
Mike	3
Braydon	2
Priya	6
Juan	2
Layla	3

Given this data, what is the *median* (the number in the middle of the data when arranged in order) and the *mode* (the most common number) for the number of servings of fruits or vegetables consumed in a day by these students in Ms. Morgan's health class?
