Problem of the Week  
Problem D  
Sale Boats  

Harold, a marina manager, purchased two boats. He then sold the boats, the first at a profit of 40% and the second at a profit of 60%. The total profit on the sale of the two boats was 54% and $88,704 was the total selling price of the two boats.

What did Harold originally pay for each of the two boats?
