

## Problem of the Week

### Problem A

### Creating an Art Kit

A teacher at Sioux Mountain School wants to purchase items for art kits to be used in their classroom. Below is a list of the items in one kit, along with the price for each item. All prices include tax.

Pencil crayons	\$1.75
Sketch book	\$2.25
Watercolour paints	\$3.15
Glue	\$1.10
Scissors	\$1.70

If the teacher has a budget of \$80 for art supplies, then estimate how many kits they can make. Justify your answer.
