

Problem of the Week

Problem B

Coding Conundrum

Viktoria is writing a program that people can use to guess her favourite number, which is 23.

- (a) Use the following blocks to create pseudocode for Viktoria's program. Note that you may not need to use all of the blocks.

say "That's not correct."

say "That's correct."

else

say "Guess my secret number!"

if guess \neq 23

if guess = 23

- (b) Using the additional blocks below, modify your pseudocode so that if the user's guess is incorrect, then the program will tell them whether their guess is too high or too low.

say "That's too low."

say "That's too high."

else if guess < 23

else if guess > 23
