

Problem of the Week

Problem A

Difference of Numbers

Consider the digits in the box below:

2	5	6	1
---	---	---	---

- (a) What is the largest number that uses each digit exactly once?
- (b) What is the smallest number that uses each digit exactly once?
- (c) Find the difference between the number you found in part (a) and the number you found in part (b).
